

Strengthening Team Development and Dynamics

About The Trussell Trust

The Trussell Trust is an anti-poverty charity and network of food banks, providing practical support to those in need while campaigning for a future without emergency food dependency.

The Challenge

The Trussell Trust wanted to strengthen its team development programme, focusing on improving team dynamics, communication, and collaboration. They also aimed to help employees gain greater self-awareness and insight into their working styles to build a more connected and effective workforce.

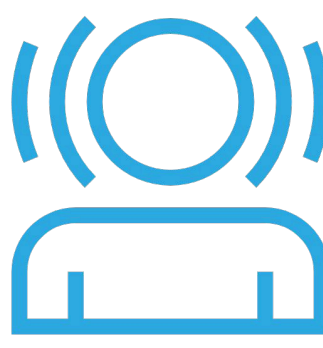

The Solution

By onboarding The Trussell Trust to the C-me platform, employees were able to share their profiles, build mutual understanding, and enhance collaboration. Some team members became C-me accredited, enabling them to run internal training and workshops. C-me has established a common language across teams, allowing employees to leverage their strengths while being mindful of potential derailers.

Results

30%
Increase in effective communication

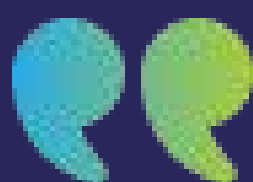

75%
Increase in self-awareness

25%
Increase in team performance

**Results reported by the Trussell Trust.*

C-me has been a fantastic tool in helping us develop our teams and enable our people to grow and flourish.
